Vol. 12 No. 5-6
Sept- Oct 1994

The Capital Area
Timex/Sinclair Users
Group

MEETING MINUTES - JULY

The meeting was called to a semblance of order at 2:00 by Manny Quintero. Attending were Ruth Feigley, Duane Parker, Barry Washington, Herb Schaaf, Cliff Watson and Tom Robbins. Minutes of the previous meeting were read by Duane Parker and approved by acclamation.

Treasurers report by Barry Washington - we are still solvent. Barry reported that our funds were now safely ensconced in a new home, the Crestar bank.

Old Buisness:

The picnic at the Digg's may be held in October - Bob will be out of town in September - date to be announced.

For the next meeting, we will be experimenting with trying to create a newsletter by a combination of cut and paste and using networked QL's. Hopefully, we all will bring articles, QL's and network cables to the meeting.

A possible future meeting topic of "SINCLAIR EMULATORS" was proposed.

New Buisness:

Cliff will be checking on storage facilities at the Crofton Library, a possible meeting site for our merry band.

Demonstration and Tutorial:

Ruth Feigley demonstrated the use of Abacus in managing and tracking the financial wheeling and dealing of her investment club.

Tom Robbins

MINUTES - AUGUST

Old Business:

Bob Diggs announced that the CATS picnic will be held on Sept. 17th, 1994 at his bayside home in Northeast. All members are invited to attend, anytime after noon. Bring food and drink.

Cliff Watson checked on the Crofton Library meeting space. No storage space is available at that location. It was agreed that this fact makes the New Carrollton library a more desirable location.

New Business:

Meeting room needs were discussed. The PG County library system must be contacted for meeting reservations in November, probably on the first Monday. Joe Miller is requested to check on the reservation schedule and cost.

At the meeting Michael J. Milton, Esq. presented CATS with two 206B-computers, two 2040 printers, one Timex 1000, a 2050-modem, many tapes, two cartridges, and several publications. Hearty thanks were offered to Mr. Milton. The use to be made of these items will be discussed at the next meeting, Sept. 10th.

The treasurer reported that there are adequate funds in our account, expenditures amounted to \$43.48 in the past month, two renewals produced \$25 in receipts.

The newsletter activity revealed that we need more articles or other items to be published. "We do not understand how Mark puts up with it!"

In September, Tom Robbins will discuss the new Menu-Driven Unzip program ("Unzip_bas"). Herb Schaaf will also tell "All I have learned about QEM Version 4.0".

PDQ -Public Domain QL Software

by Tom Robbins

In a recent CATS newsletter, Herb Schaaf described the use of the "Unzip" program to decompress files. As you can see from his write up, the program is somewhat cumbersome to use - lots of command line switches and finicky syntax. There is an elegant and easy to use front end for unzipping files in the public domain by Richard Kettlewell called Zipper_{bas}. Highly recommended if you want to save yourself a lot of aggravation. NB - needs Toolkit 2 to run.

There is a new release of the Psion XCHANGE program - Version 4.0 now available. It has the same features as the earlier releases, but appears to run somewhat faster.

**RECENT LIBRARY LISTINGS FOR THE QL ON
COMPUSERVE**

(downloaded by Duane Parker)

The following list shows recent files for the QL that are in the "CLUB FORUM" on CompuServe. These are all public domain material. Some of them are programs, some are lists of messages from communication nets or bulletin boards, or manuals for certain programs. The files may be downloaded from CompuServe.

QLIBM.ZIP/Bin Bytes: 10240,
Count: 1, 27-Jul-94

Title : Modified QLiberator runtimes
v3.36

Modified QLiberator runtimes (v3.36).
Fixes ERNUM bug.

ACPENG.TXT/Text Bytes: 20763,
Count: 2, 27-Jul-94

Title : ACP_HELP (english)

English translation of the help file for
ACP - Archiver Control Panel.

ACP2.LZH/Bin Bytes: 31232,
Count: 2, 27-Jul-94

Title : Archiver Control Panel

A pointer driven front end for
arc/zip/zoo/lhq/lha archivers. Uses menu
extensions if you have them, but not
required. Note that you must have the
archiver executables, this program does
not contain them. It also has a
French help file but an English
translation of it is available here in
the library.

FIDO.ZIP/Bin Bytes: 50176,
Count: 7, 13-Jul-94

Title : QL FIDOnet conference June
28-July 12, 1994
A ZIP of QL FIDOnet conferences from
June 28 to July 12, 1994, logged from
QBBS bulletin board in the UK. Includes
INTQL, Minerva, and QUANTA.
